

Sprint 3 Planning:

Team: ScrumOfTheEarth (7.TUES-14.30-7)

GitHub Link: <https://github.com/RMIT-SEPT/majorproject-7-tues-14-30-7>

DEFINITION OF DONE:

A task is deemed complete once tests including a **peer review** of code and unit tests have been passed, the code has been committed in an individual branch, a pull request has been created, and is ready for merging.

Peer review: the team has looked over code to look for bugs and errors, before it is merged. In this review process code structure that would slightly improve efficiency is prioritised less if other work is still to be completed.

Date: 03/09/2020

Scrum Master: Callum

Development Team: Adrian, Giacomo, Matthew, Sovatharo

Sprint goal

- Create a minimum viable product with the ability to log in, view and book with businesses, view a dashboard as a worker, such that all major aspects of the project are functional, and while incorporating CircleCI and Docker under AWS. Past features that require more development will be included in this Sprint.

User Stories:

Backlog #	User story	Function	Story Point Value
34	As a customer I want to be able to log in so that I can book multiple appointments on one account	Log in as user	Highest
20	As a customer I want to be able to choose from numerous services so that I can book the exact one I require	Book with a service	High
39	As a customer, I want to be able to search for a business so that I can view a friend's recommendation	Search for a business	High
2	As a business owner I want to be able to adjust working times for the coming month so that I can plan shifts	Modify service details	High

57	As a worker I want to be able to set my availablilities so that I am not rostered when I am not available	Set availabilities as worker	High
43	As a new user I want to be able to register so that I can login as a customer and use the services provided.	Sign up as variety of account types	High

Sprint Estimation

Based on prior experience, requirements for the tasks and priorities, this Sprint has a high percentage of High priority tasks, and thus it is estimated a relatively large amount of time to complete the Sprint is required.

TASKS:

Sprint 3 has 5 new tasks to complete:

- Log in as a user (34)
- Book with a service (20)
- Search for a business (39)
- Modify service details (2)
- Incorporate Docker and CircleCI under AWS
