Date: 18/08/2020

Scrum Master: Callum

Development Team: Adrian, Giacomo, Matthew, Sovatharo

TASKS:

Sprint 2 has 5 tasks to complete:

- Dashboard On Login (28)
- Home Page (32)
- New "Customer" User (38)
- View Business Page (47)
- View Worker Profile Page (52)

| Backlog # | User Story | Sub-Tasks | Developer Assigned |
|-----------|---|--|-----------------------|
| 28 | As a customer I want to see a personalised homepage when I log in so that I can access booking history quickly. | <ul style="list-style-type: none">• Create a login webpage so customers can log in• Make sure login page communicates with API to authenticate users.• Redirect users to their personal dashboard upon successful login.• Make webpage display booking history of customer on dashboard through GET request from the API. | Sovatharo Huy |
| 32 | As a customer I want to see a contact-us page so that I know where I can go and who I can talk to when I am stuck or have an issue. | <ul style="list-style-type: none">• Further develop adaptable CSS focusing on good UX principles• Begin routing to login page• Create space for business' to be displayed on homepage• Write front end tests | Callum Ackland |
| 38 | As a new customer I want to be | <ul style="list-style-type: none">• Create a way to | Matthew |

| | | | |
|----|---|---|------------------------|
| | able to create an account so that I can use the services provided by the company. | manage session information <ul style="list-style-type: none"> • Complete JUnit testing for User API • Create a sign up front end page In react • Implement front-end testing for sign up page • Implement full state management system • Implement correct handling of authentication information (username and password) with secure storage. | |
| 47 | As a customer I want to be able to view a service provider's page so that I can assess whether I want to book an appointment with them. | <ul style="list-style-type: none"> • Junit testing for controller and service class. • <body> front end design/layout with css/bulma • Front end testing of Businesspage component • Connect business API to worker API so I can add worker to worker table | Adrian Vong |
| 52 | As a worker I want to see my available shifts so that I know when I am working throughout the week. | <ul style="list-style-type: none"> • JUnit testing for worker • JUnit testing for service • Showing worker and service model information in react front-end • Improving CSS design for front end | Giacomo Pirrone |

| Bug/Feature | Status | Details |
|--|---------|--|
| Uncaught (in promise) Error in HomePageContent.tsx | Unfixed | Issues with the get request for all businesses in the database causes an uncaught error. |
